KIELY INDUSTRIAL COATINGS

K.I.C.

CAPABILITY STATEMENT

INDUSTRIAL PROTECTIVE COATINGS | PROJECT MANAGEMENT | SPECIALIST CONTRACTOR COORDINATION

One point of contact. Specialist delivery. K.I.C. works directly with customers, scopes each project and coordinates suitable independent specialist subcontractors. The appointed subcontractors carry out the physical coating work.

WHAT WE COORDINATE

STRUCTURAL STEEL Protective coating projects for suitable industrial and commercial steelwork, including portal frames.	**INDUSTRIAL ROOFS** Specialist coating projects for suitable existing industrial roofing systems, subject to assessment.
METAL CLADDING Coating and refurbishment to help protect and improve suitable existing metal cladding.	**SPECIALIST COATINGS** Systems selected to suit the surface, site conditions and project requirements.

HOW A PROJECT WORKS

01 ENQUIRY Send the site location, surface, approximate area and photographs.	**02 ASSESSMENT** K.I.C. reviews the requirements and identifies a suitable specialist contractor and system.	**03 QUOTATION** Receive a written quotation with the proposed scope, price and arrangements.
04 PRE-START Contractor suitability, insurance, site needs and safety documents are checked and agreed.	**05 DELIVERY** The appointed independent contractor prepares and applies the agreed coating system.	**06 HANDOVER** K.I.C. coordinates completion and handover to the agreed project arrangements.

QUOTATIONS, PAYMENT & SAFETY

Every project is assessed individually. Your written quotation confirms the scope, coating system, price, any deposit or staged payments, programme and handover. Any warranty is confirmed in writing where available and agreed. Before work starts, contractor competence, relevant insurance, access and required safety documentation are checked and agreed.

PROJECT ENQUIRIES FROM JANUARY 2027	SEND SITE DETAILS FOR AN INITIAL ASSESSMENT
