KIELY INDUSTRIAL COATINGS

CAPABILITY STATEMENT

INDUSTRIAL PROTECTIVE COATINGS | PROJECT MANAGEMENT | SPECIALIST CONTRACTOR COORDINATION

A managed approach to industrial coating projects. K.I.C. works directly with customers, assesses project requirements and coordinates delivery through appropriate independent specialist subcontractors who carry out the physical coating work.

OUR SERVICES

Structural steel protection
Protective coating projects for suitable industrial and commercial structural steelwork, including steel portal frames.

Industrial roof coatings
Specialist coating projects for suitable existing industrial roofing systems, subject to assessment.

Metal cladding protection and refurbishment
Coating projects to help protect and improve the condition of existing metal cladding.

Specialist industrial coatings
Suitable protective coating applications selected according to the substrate, site conditions and project requirements.

HOW A PROJECT WORKS

1. Tell us about the job
Send the site location, surface type, approximate area and photographs by email or WhatsApp.

2. We assess the requirements
K.I.C. reviews the information and considers an appropriate specialist contractor and coating system.

3. Receive a written quotation
The quotation sets out the proposed scope, price and project arrangements.

4. Pre-start checks and planning
Before work begins, contractor suitability, relevant insurance, site requirements and necessary safety documentation are checked and agreed.

5. Specialist coating work
The appointed independent contractor carries out the agreed preparation and coating application to the project specification and manufacturer guidance.

6. Project handover
K.I.C. coordinates completion and handover in line with the arrangements agreed for the project.

QUOTATIONS, PAYMENT AND SAFETY

Every project is assessed individually. Your written quotation will confirm the agreed scope, proposed coating system, price, any deposit or staged payment arrangements, expected programme and handover arrangements. Any applicable warranty will be identified in writing where available and agreed.

K.I.C. coordinates project and site requirements with the appointed independent contractor. Contractor competence, relevant insurance, access arrangements and required project documentation will be checked and agreed before appointment and mobilisation.
